

Staging Carts with Increased Versatility

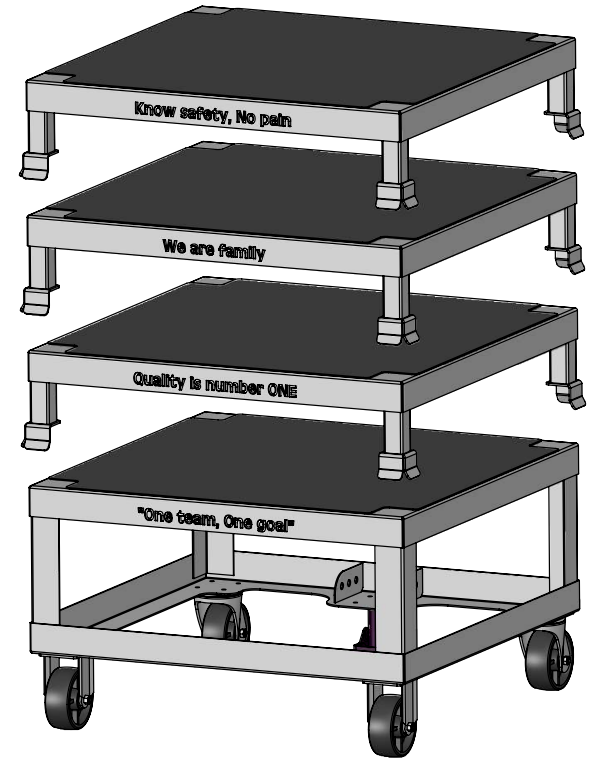

Mobile and efficient, while maintaining a small footprint and high level of organization

Intended Use:

These carts allow many parts to be staged in a systematic manner and a small footprint, while being extremely modular and mobile, and ready to accommodate the current job flow. Any number of lightweight "tiers" can be added to the carts on any given day to help with kitting/staging for downstream processes.

Culture Building:

Carts and tiers can be customized with slogans that reflect your company's mission statement. A few examples are shown for reference.

Optional soft/durable top surface to prevent scratches and withstand wear

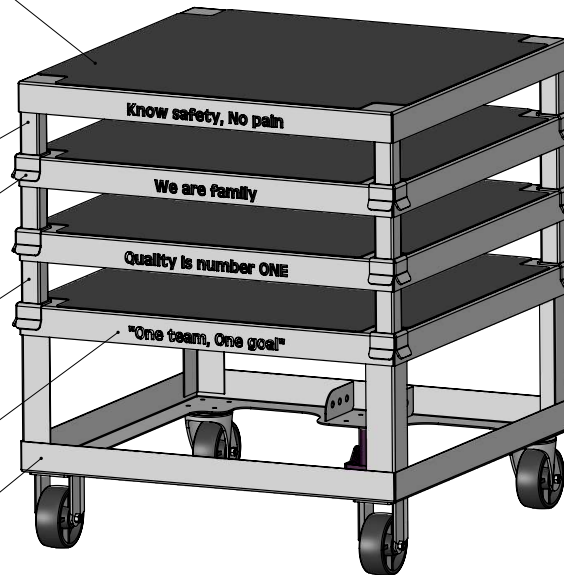

Each additional tier is removable (lightweight aluminum) and securely rests on the one below it -- locked in on all 4 sides

Flared funnels for easy alignment

Different heights available, depending on your needs.

Customizable slogans cut thru side walls to help reinforce company culture

Base cart is welded steel construction

Other Notes:

- 2 swivel casters, 2 rigid casters
- 1 foot brake
- All casters bolted to frame
- Powdercoated to standard RAL color
